4TH ANNUAL PGME GLOBAL HEALTH DAY

Humanizing Global Health: Achieving Equity

and

Class of 2017

Global Health Education Initiative Graduation

McLeod Auditorium

Faculty of Medicine, University of Toronto

Thursday, June 8, 2017

Welcome!

Dear Colleagues and Friends,

The world is rapidly globalizing at a pace that's hard to fully comprehend. New technology allows for healthcare innovation and accessibility that is unprecedented in many sectors. However, despite these incredible advances, health inequity persists – in many ways the disparity is more prevalent now than it ever has been. At the 2016 World Economic Summit, Oxfam reported that “in 2015, just 62 individuals had the same wealth as 3.6 billion people – the bottom half of humanity. This figure is down from 388 individuals as recently as 2010.” (Oxfam, Briefing Paper, January 18, 2016)

Why do these incredible inequities exist globally and in our own backyard?

Why have the monumental advances in health care not improved the lives of marginalized populations living in extreme circumstances of economic and social isolation? Where have we gone wrong and how do we get back on the right path?

Today's 2017 Global Health Day, led by PGME, includes University of Toronto leadership across disciplines dedicated to urgent global health issues. With the goal of achieving “equity and humanizing global health,” our Global Health Day is an education initiative with objectives:

- To develop a deeper understanding of the social, political, economic, and professional challenges to improving global health for all.
- To encourage critical thought about how inequities can be overcome.
- To introduce themes and issues from across disciplines on the challenges of inequity in global health.
- To identify opportunities to continue your global health interests, education, and experience.

The University of Toronto and the Toronto community represents extraordinary leadership in global health education, research, service and activism across disciplines, locally and across all continents, and this Global Health Day program showcases many of these leaders and celebrates the accomplishments of our GHEI graduates.

Thank you for learning with us ...

Your 2017 PGME Global Health Day Planning Committee

Dr. Jonathon Herriot	Family Medicine PGY1
Dr. Yiwei Hu	Family Medicine PGY1
Dr. Taylor Kain	Internal Medicine PGY2
Dr. Kinshuk Kumar	OBS/GYN PGY1
Dr. Robert Puckrin	Internal Medicine PGY1
Dr. Melody Ren	Family Medicine PGY1
Dr. Sanskriti Sasikumar	Neurology PGY1
Dr. Barry Pakes	PGME Global Health Academic Lead
Ms. Judy Kopelow	PGME Global Health Programs and Strategic Initiatives

Special thanks to ...

Dr. Salvatore Spadafora, Vice Dean Post MD Education
Postgraduate Medical Education and Continuing Professional Development

In Memoriam...

Dr. Mark Wainberg (1948 - 2017) died tragically on April 11, 2017.

*Dr. Wainberg was Director of the McGill University AIDS Centre at the Montreal Jewish General Hospital and
Professor of Medicine and of Microbiology at McGill University.*

*He will be remembered as a brilliant scientist, encouraging educator, determined activist, compassionate colleague and friend;
— always with a sparkle in his eye and a bounce in his step. Heartfelt sympathies to his family.*

Thank you for learning with us ...
