Welcome!

Dear Colleagues and Friends,

Thank you for joining us for our 2019 Postgraduate Medical Education Global Health Day on Women, Girls and Global Health. We appreciate you taking time to attend and more so to contribute to thoughtful discussion with colleagues across specialties and programs and advocates across disciplines and generations. You each arrive with different understanding of health challenges for women and girls locally, nationally and internationally. This day will encourage sharing of ideas on complex and seemingly unsolvable global and very human world problems. This day will also give rise to how you can contribute to advancing equitable and quality global health for women, girls and for all members of disenfranchised local and global communities.

We will learn from our Keynote speaker, Dr. Wendy Lai that individual determination, leadership by women, united with likeminded communities of determined and compassionate professionals - as found in Doctors Without Borders/Médecins Sans Frontières Canada - can and does impact lives.

Our 6th Annual Global Health Day is planned by a resident committee also from across programs and specialties and includes passionate presenters who have established themselves as effective advocates for women and girls. This Global Health Day is unique in that all on the podium, all presenters and all moderators are women.

We especially recognize Dr. Catharine Whiteside, Former Dean of Medicine, University of Toronto, 2006-2014.

The specific educational objectives for participants today are to:

- introduce themes and issues related to global health for women and girls from a variety of perspectives.
- develop a deeper understanding of motivations and processes for effective global health advocacy for/by women and girls.
- encourage participation and engagement in advancing global health for women and girls.
- create a forum for peer to peer discussion; to share global health concerns, education, and experience..

The University of Toronto and the Toronto community represents extraordinary leadership in global health education, research service and advocacy across disciplines, locally, nationally and internationally. This Global Health Day program showcases many of these leaders and celebrates the accomplishments of our PGME Global Health Education Initiative 2019 graduates.

Thank you for learning with us ...
